

Pine-Strawberry Water Improvement District

6306 W. Hardscrabble Road, Pine AZ 85544

Date: January 7, 2013

Dear PSWID Customer:

Today we launched our FY2013 meter replacement program. This investment program was instituted because most of our water meters are several decades old and most likely, not measuring water consumption accurately. Industry standards recommend that water meters should be replaced every 10 to 12 years.

For the next several months, certain portions of Pine and all of Strawberry will experience short service interruptions when we come to your home and replace the water meter. Next year, the remainder of the water meters in Pine will be replaced.

Thank you for your cooperation and Happy New Year!

Sincerely,

Brad Cole
District Manager
