

Chairman's Activity Highlights for March 2021

1. Participated in personnel activities and concerns with Personnel Committee for both field and office staff.
2. Substantial continuing effort was focused on water leak issues in Portals III. Utilized outside experts to assist in locating the source of lost water.
3. Participated with the Projects group each Thursday morning focusing on both WIFA and USDA potential projects.
4. Concerned with requests for issuance of "will serve" letters and our water supply availability to meet needs of new requests.
5. Requested detailed work relative to conditions and needs of presently inactive wells.
6. Made plans to consult with experts from Payson and Salt River Project relative to planning for future development needs and resource availability to help guide the District Board.
7. Met often with the General Manager concerning day to day issues in operation of the District
8. The Milk Ranch 2 well was refitted, cleaned and put back into service.
9. Arrangements were made to get the smaller well in Portals III ready for service in the Summer.
10. Sent out a new "Request for Qualifications" for additional engineering services.
