RE: WILL SERVE LETTER MORATORIUM

The Board of Directors of the District voted, at the Board Meeting of this date, to institute a moratorium on issuing Will Serve Letters for new service at this time.

The District's system is experiencing severe drought conditions, water table in the wells dropping below the equipment causing the wells to be turned off, leaks and significant production water losses. **(See *Emergency Well Grant Application to USDA on the Website*)**. The District has been and will continue to work with the engineering firm to help track the water losses to identify and make repairs to the system.

Therefore, until the water losses are located and repaired, the Board took the action necessary to allow time for the process of repairing water losses throughout the system.

Sincerely,

Alan P. Kleinman
Chairman
